

Lieke T. Lee, D.P.M

Podiatric Physician and Surgeon

- Highly trained foot and ankle surgeon specializing in the diabetic foot. My training is unique compared to other podiatric physicians. In addition to forefoot and rearfoot surgery, I emphasize in medical and surgical management of chronic wounds related to diabetes, peripheral vascular disease, neuropathy and this involves working closely with other departments including vascular surgery. I have a strong medical background with extensive experience with in-house patient management.

Professional experience

- **Winchester Hospital**, Winchester, MA 2003-present
Medical Staff; Foot Surgery
 - Performed all aspects of foot surgery from elective cases to reconstructive surgery.
 - Strong emphasis in limb salvage, especially within the diabetic population specializing in closing diabetic foot wounds via random and nonrandom flaps including rotational, pedicle, and split thickness skin grafts.
 - In-patient medical and surgical management of complex diabetic lower extremity wounds and infections.
- **Winchester Hospital Wound Healing Center**, Winchester, MA 2003-present
Medical Staff; Foot Surgery
 - Administered outpatient care treating complicated, chronic wounds associated with diabetes, peripheral neuropathy, venous stasis, peripheral vascular disease, and decubitus ulcers.
 - Performed local wound care including sharp debridements, application of biological skin grafts and xenografts, utilization of negative pressure wound therapy dressings, and various other advanced wound care products.
- **Affiliates in Foot Care**, Stoneham, MA 2003-present
Associate; Foot Surgery
 - Administered outpatient care treating all aspects of foot pathologies from bunion deformities to complex rearfoot deformities
