

POST-OPERATIVE INSTRUCTIONS

Ingrown Toenail Procedures Wart Removal Procedures

1. Leave bandage on for 24-48 hours as per the doctor.
2. Begin twice daily soaks with warm water and Epsom salt.
3. Apply antibiotic ointment prescribed/recommended by your doctor and cover with a band aid.
4. Some drainage, tenderness and redness is normal. The soaks will help remove the drainage.
5. Keep your follow up appointment so that the doctor can evaluate the healing.
