Evenup (Compensates For Cast or Cast Boot Height Difference) 800-334-1906

"The Evenup" is a simple and inexpensive way to equalize a patient's limb length while walking in a leg cast or cast boot. If one leg is shorter than the other, ***"The Evenup"*** makes both legs "even in length," and reduces stress on the knees, hips, and lower back from the strain of walking in a cast or cast boot.

Features:

- Easy application and adjustment with nylon straps, thermoplastic rubber uppers, and Velcro closure.
- Fits a variety of shoes; easily moved from shoe to shoe.
- Can adjust height from 1.3 cm (1/2") to 2.1 cm (0.8") in seconds.
- The outer sole is made of comfortable and durable EVA.
- Universal (fits right or left shoe).

Easy Application - Secure Fit

To Find and purchase "Evenup" on our online store:

1. Visit www.footandankleassociates.com
2. Click on "Visit our online store"
3. Search for "Evenup" by name or product #1022
